

»» OV-10B BRONCO

The North American Rockwell OV-10 Bronco is a turboprop light attack and observation aircraft. It was developed in the 1960's for counter insurgency (COIN) combat. One of its primary missions was Forward Air Control (FAC) during the Vietnam and Cold War.

The OV-10B variant was produced for Germany in the target tug role. 18 aircraft were delivered in the early 70's and were equipped with target towing equipment inside the fuselage. A clear dome replaced the rear cargo door and a rearwards facing seat was installed in the cargo bay for the winch operator.

After the retirement in 1990, many OV-10Bs found their way to various aviation museums. "99+18" was acquired by Bronco Demo Team and restored to flying condition in 2012. It is represented in it's fully original service markings.

»» 50 YEARS BRONCO

The first flight of the OV-10 Bronco took place on July 16th, 1965 at the North American Aviation factory airfield in Columbus, Ohio, USA.

»» 5 YEARS BRONCO DEMO TEAM

Bronco Demo Team was founded in 2010 by a group of OV-10 enthusiasts, the main goal being to display the Bronco at air shows around Europe. The team consists of Crew Chiefs and Cheerleaders, all volunteering but dedicated aviation professionals.

Each year Bronco Crew Chiefs attend a 2-day ground course, ensuring the smooth and safe operation of the airplane at air shows. Our Bronco Cheerleaders add a gentle female touch to any appearance, entertaining and informing the public in our promotional stand and shop.

OV-10 BRONCO DEMO TEAM

>> BAVARIAN BRONCO

For the 2015 season we are proud to operate under the special Royal Bavarian Air Force banner. This seemingly fictive scheme is in fact historically correct as 99+18 had been adorned in such a livery when it was based out of Munich in the early 1980's. An exciting prospect is that our Cheerleaders will become Bavarian Dirndls for one year too!

>> PARTICULARS

- **Wingspan:** 40feet (12,19m)
- **Length:** 44feet (13,41m)
- **Height:** 15feet 2inches (4,62m)
- **Empty Weight:** 6,893pounds (3127kg)

- **Max. Weight:** 14,444pounds (6552kg)
- **Powerplant:** 2x Garrett T76 (715shp)
- **Maximum speed:** 288mph (463km/h)
- **Service Ceiling:** 30,000feet (9150m)
- **Range:** 1382miles (2224km)

>> MISSION

The Bronco Demo Team's mission is to preserve and perpetuate the history of the OV-10 Bronco and the people who designed, built, flew and maintained this unique airplane.
